

MNCM Measurement and Field Specifications for Depression

Updated 12-30-2009

MNCM Measure	Depression Remission at Six Months Please refer to table starting on Page 4 for complete list of measures.
Description	This measure is used to assess the percentage of patients who have reached remission at six months (+/- 30 days) after being identified as having an initial PHQ-9 score > 9. Remission is defined as a PHQ-9 score less than 5.
Methodology	Population identification is accomplished via a query of a practice management system or Electronic Medical Record (EMR) to identify the population of eligible patients (denominator). Data elements are either extracted from an EMR system or abstracted through medical record review.
Rationale	The priority aim addressed by this measure is to improve the outcomes of treatment for patients with major depression or dysthymia. The Center for Disease Control and Prevention states that 15.7% of people report being told by a health care professional that they had depression at some point in their lifetime. Persons with a current diagnosis of depression and a lifetime diagnosis of depression or anxiety were significantly more likely than persons without these conditions to have cardiovascular disease, diabetes, asthma and obesity and to be a current smoker, to be physically inactive and to drink heavily. According to National Institute of Mental Health (NIMH), 6.7 percent of the U.S. population ages 18 and older (14.8 million people) in any given year have a diagnosis of a major depressive disorder. Major depression is the leading cause of disability in the U.S. for ages 15 - 44. Additionally, dysthymia accounts for an additional 3.3 million Americans. Suicide rates for Minnesotans are 10.4 per 100,000 or 1.3 suicides per day, with the highest rates among the following groups: males (4 times greater than females), ages 30 to 49 years, and non-hispanic whites.
Denominator	<p>Patients meeting all of the following criteria:</p> <ul style="list-style-type: none"> • Adults age 18 and older; no upper age limit • Patient visits or contacts during the measurement period • Diagnosis of Major Depression or Dysthymia; ICD-9 codes include: <ul style="list-style-type: none"> ○ 296.2x Major depressive disorder, single episode ○ 296.3x Major depressive disorder, recurrent episode ○ 300.4 Dysthymic disorder ○ For primary care providers, these diagnosis codes can be in <u>any</u> position ○ For behavioral health providers, the depression or dysthymia diagnosis codes need to be listed as the <u>primary diagnosis</u>. This is to insure that the patient is primarily being treated for major depression and does not have other more serious psychiatric conditions like psychoses, schizophrenia or bipolar disorder with underlying depression. • Initial PHQ-9 score is > nine • Include the following provider specialties: Family Practice, Internal Medicine, Geriatric Medicine, and Psychiatry/ Behavioral Health.
Exclusions	<ul style="list-style-type: none"> • Patient death • Hospice • Permanent Resident of Nursing Home • Bipolar Disorder (Principal Diagnosis; initially diagnosed as depression but upon further treatment & evaluation primary diagnosis changed to bipolar disorder) • Personality Disorder (Principal Diagnosis; initially diagnosed as depression but upon further treatment & evaluation primary diagnosis changed to personality disorder)
Numerator Rate	<ul style="list-style-type: none"> • The number of patients with major depression or dysthymia <u>and</u> an initial PHQ-9 score > nine whose PHQ-9 score at six months (+/- 30 days) is less than 5.

Bipolar and Personality Disorders ICD-9 Codes

ICD-9 Code	ICD-9 Description
296.00	Bipolar I Disorder, Single Manic Episode, Unspecified
296.01	Bipolar I Disorder, Single Manic Episode, Mild
296.02	Bipolar I Disorder, Single Manic Episode, Moderate
296.03	Bipolar I Disorder, Single Manic Episode, Severe Without Psychotic Features
296.04	Bipolar I Disorder, Single Manic Episode, Severe With Psychotic Features
296.05	Bipolar I Disorder, Single Manic Episode, In Partial Remission
296.06	Bipolar I Disorder, Single Manic Episode, In Full Remission
296.10	Manic disorder, recurrent episode; Unspecified
296.11	Manic disorder, recurrent episode; Mild
296.12	Manic disorder, recurrent episode; Moderate
296.13	Manic disorder, recurrent episode; Severe Without Psychotic Features
296.14	Manic disorder, recurrent episode; Severe With Psychotic Features
296.15	Manic disorder, recurrent episode; In Partial Remission
296.16	Manic disorder, recurrent episode; In Full Remission
296.40	Bipolar I Disorder, Most Recent Episode Manic, Unspecified
296.41	Bipolar I Disorder, Most Recent Episode Manic, Mild
296.42	Bipolar I Disorder, Most Recent Episode Manic, Moderate
296.43	Bipolar I Disorder, Most Recent Episode Manic, Severe Without Psychotic Features
296.44	Bipolar I Disorder, Most Recent Episode Manic, Severe With Psychotic Features
296.45	Bipolar I Disorder, Most Recent Episode Manic, In Partial Remission
296.46	Bipolar I Disorder, Most Recent Episode Manic, In Full Remission
296.50	Bipolar I Disorder, Most Recent Episode Depressed, Unspecified
296.51	Bipolar I Disorder, Most Recent Episode Depressed, Mild
296.52	Bipolar I Disorder, Most Recent Episode Depressed, Moderate
296.53	Bipolar I Disorder, Most Recent Episode Depressed, Severe Without Psychotic Features
296.54	Bipolar I Disorder, Most Recent Episode Depressed, Severe With Psychotic Features
296.55	Bipolar I Disorder, Most Recent Episode Depressed, In Partial Remission
296.56	Bipolar I Disorder, Most Recent Episode Depressed, In Full Remission
296.60	Bipolar I Disorder, Most Recent Episode Mixed, Unspecified
296.61	Bipolar I Disorder, Most Recent Episode Mixed, Mild
296.62	Bipolar I Disorder, Most Recent Episode Mixed, Moderate
296.63	Bipolar I Disorder, Most Recent Episode Mixed, Severe Without Psychotic Features
296.64	Bipolar I Disorder, Most Recent Episode Mixed, Severe With Psychotic Features
296.65	Bipolar I Disorder, Most Recent Episode Mixed, In Partial Remission
296.66	Bipolar I Disorder, Most Recent Episode Mixed, In Full Remission
296.7	Bipolar I Disorder, Most Recent Episode Unspecified

301.89	Other personality disorders
301.9	Unspecified personality disorder

MNCM Measurement and Field Specifications for Depression

Updated 12-30-2009

The following is a list of measures for the depression population. Not all measures will be used for public reporting or BTE's reward program, but all rates will be available to the medical groups. Internal = medical groups will see their own results and data may be used for reporting at a summary state-wide level but not by individual medical group, Public = measure rates will be reported publically by clinic site on the MNMCM website and in the Health Care Quality report, BTE = measure rates will be used to determine BTE rewards.

	Measure	Definition	Reporting
#1	Percentage of the adult population with major depression or dysthymia during the measurement period	<p>Adults age 18 & older with a diagnosis of major depression or dysthymia with at least one visit to a billable/ eligible provider during the measurement period. ICD-9 codes:</p> <ul style="list-style-type: none"> ○ 296.2x - Major Depressive disorder, single episode ○ 296.3x – Major depressive disorder, recurrent episode ○ 300.4x – Dysthymic Disorder <p style="text-align: center;"><u># adult patients with depression (296.2x, 296.3x and 300.4)</u> total # adult patients</p>	Internal
#2a	<p>Percentage of the adult population with unspecified depression diagnosis during the measurement period</p> <p>These patients will not be included in the subsequent outcome measures for depression</p>	<p>Adults age 18 & older with a diagnosis of Depression; Not Otherwise Specified with at least one visit to a billable/ eligible provider during the measurement period</p> <p>ICD-9 codes:</p> <ul style="list-style-type: none"> ○ 311 - Depressive disorder, not elsewhere classified <p style="text-align: center;"><u># of adult patients with diagnosis of depression not elsewhere classified (311)</u> # total adult patients</p> <p><i>Note: If a patient has both codes during the measurement period (311 and one of the major depression or dysthymia codes) count the patient as having major depression or dysthymia, not depression NOS</i></p>	Internal
#2b	Percentage of the adult population with <u>depression</u> who have unspecified depression diagnosis during the measurement period	<p>Adults age 18 & older with a diagnosis of depression during the measurement period. This measure is tracking the rate of the use of 311 unspecified depression as a percent of all patients diagnosed with depression.</p> <p style="text-align: center;"><u># of adult patients with diagnosis of depression not elsewhere classified (311)</u> (# adult patients with 311) + (# adult patients with 296.2x, 296.3x and 300.4)</p>	Internal

MNCM Measurement and Field Specifications for Depression

Updated 12-30-2009

	Measure	Definition	Reporting
#3	Percentage of the adult population with major depression or dysthymia who had a PHQ-9 during the measurement period	<p>Percent of patients with a diagnosis of major depression or dysthymia (296.2, 296.3 or 300.4) with a completed PHQ-9 during the measurement period. This measure is determining the rate of the use of the PHQ-9 tool for the medical group's population of patients with major depression or dysthymia.</p> <p style="text-align: center;"> <u># adult pts with depression (296.2x, 296.3x and 300.4) who had a PHQ-9 administered</u> # adult patients with depression (296.2x, 296.3x and 300.4) </p>	Public
#4	Percentage of the adult population with major depression or dysthymia whose index PHQ-9 score is > nine	<p>Percent of patients with a diagnosis of major depression or dysthymia (296.2, 296.3 or 300.4) with a completed PHQ-9 during the measurement period whose PHQ-9 score is > 9.</p> <p style="text-align: center;"> <u># adult pts with depression (296.2x, 296.3x and 300.4) and PHQ-9 > 9</u> # adult pts with depression (296.2x, 296.3x and 300.4) who had a PHQ-9 administered </p> <p><i>Note: Index contact is the first contact with confirming diagnosis and PHQ-9 score is > 9; serves at the starting measurement point for each patient included in the denominator.</i></p>	Internal
#5	PHQ-9 follow-up assessment at six months	<p>Percent of patients with a diagnosis of major depression or dysthymia (296.2, 296.3 or 300.4) and a PHQ-9 score at the index contact > 9 who have a follow-up PHQ-9 test at 6 months from the index contact date with a "grace period" of 60 days, + 30 or - 30 days from the date of the index contact. The <u>most recent</u> PHQ-9 score within this window is the score that will be used.</p> <p style="text-align: center;"> <u># adult pts with depression & PHQ-9 > 9 who have 6 month PHQ-9 (+/- 30 days)</u> # adult pts with depression with index contact PHQ-9 > 9 </p>	Internal
#6	PHQ-9 with a 50 percent or more decrease in score (response) at six months	<p>Based on the denominator of patients with major depression or dysthymia (296.2, 296.3 or 300.4) whose initial PHQ-9 is > 9, the percent of patients who have a reduction in their PHQ-9 score at six months by 50 percent or greater.</p> <p style="text-align: center;"> <u># adult pts with >/ = 50% decrease in PHQ-9 score at 6 months(+/- 30 days)</u> # adult pts with depression with index contact PHQ-9 > 9 </p> <p><i>For example, if a patient's initial PHQ-9 was 21 and the six month PHQ-9 is 10, this patient has achieved a response outcome.</i></p>	Internal
#7	PHQ-9 score < five (remission) at six months	<p>Based on the denominator of patients with major depression or dysthymia (296.2, 296.3 or 300.4) whose initial PHQ-9 is > 9, the percent of patients whose six month PHQ-9 score is less than five. This is the definition of remission.</p> <p style="text-align: center;"> <u># adult pts with a PHQ-9 score < 5 at 6 months(+/- 30 days)</u> # adult pts with depression with index contact PHQ-9 > 9 </p>	Public and BTE

MNCM Measurement and Field Specifications for Depression

Updated 12-30-2009

Measure	Definition	Reporting
#8 PHQ-9 follow-up assessment at twelve months	Percent of patients with a diagnosis of major depression or dysthymia (296.2, 296.3 or 300.4) and a PHQ-9 score at the index contact > 9 who have a follow-up PHQ-9 test at 12 months from the index contact date with a “grace period” of 60 days, + 30 or - 30 days from the date of the index contact. The <u>most recent</u> PHQ-9 score within this window is the score that will be used. $\frac{\# \text{ adult pts with depression \& PHQ-9 } > 9 \text{ who have 12 month PHQ-9 (+/- 30 days)}}{\# \text{ adult pts with depression with index contact PHQ-9 } > 9}$	Internal
#9 PHQ-9 with a 50 percent or more decrease in score (response) at twelve months	Based on the denominator of patients with major depression or dysthymia (296.2, 296.3 or 300.4) whose initial PHQ-9 is > 9, the percent of patients who have a reduction in their PHQ-9 score at 12 months by 50 percent or greater. This is the definition of a response. For example if a patient’s initial PHQ-9 was 16 and the 12 month PHQ-9 is 8, this patient achieved a response outcome. $\frac{\# \text{ adult pts with } >/ = 50\% \text{ decrease in PHQ-9 score at 12 months}}{\# \text{ adult pts with depression with index contact PHQ-9 } > 9}$	Internal
#10 PHQ-9 score < five (remission) at twelve months	Based on the denominator of patients with major depression or dysthymia (296.2, 296.3 or 300.4) whose initial PHQ-9 is > 9, the percent of patients whose 12 month PHQ-9 score is less than five. This is the definition of remission. $\frac{\# \text{ adult pts with a PHQ-9 score } < 5 \text{ at 12 months}}{\# \text{ adult pts with depression with index contact PHQ-9 } > 9}$	Public

- Measures are calculated from two sources. The population counts entered prior to file submission are important for measures # 1, 2a, 2b, 3 and 4. Measures 5 through 10 are calculated based on the patients whose initial PHQ-9 score is > nine and are submitted in to the portal as part of the direct data submission process.
- Response is defined as a 50% or more reduction of PHQ-9 score
- Remission is defined as a PHQ-9 score of less than 5
- PHQ-9 scores will be included if they are plus or minus 30 days of the point of measurement. For example a patient’s index contact date (starting date) is 2/15/2008. The six month date from this time would be 8/15/2008, but the patient’s contact date for PHQ-9 is 8/27/2008; this PHQ-9 score and date would be accepted because it is within the 60 day grace period.
- The most recent PHQ-9 within the +/- 30 days will be used
- For the 2010 BTE rewards program, the only measure that will be used is the six-month remission rate defined as a six-month PHQ-9 score of < 5.

MNCM Measurement and Field Specifications for Depression

Updated 12-30-2009

Data Element Number/ Name	Notes	Excel Format	Example
PatientID	<p>Unique identifier for this patient assigned by the clinic.</p> <ul style="list-style-type: none"> • Sort file by PatientID and then Contact Date to allow for programming logic • Do not submit an identifiable number such as MRN, account number or SSN. • <i>REMEMBER to keep a "crosswalk" between the patient ID and the patient name and DOB to help clinic staff locate the record for validation audit.</i> 	Text	56609
Date of Birth	<p>Enter the patient's date of birth.</p> <p>Patient's age must be 18 or older (no upper age limit). For purposes of population identification, It is acceptable to use age at the time of the encounter or birth date earlier than 12/31/1991.</p>	Date (mm/dd/yyyy)	05/08/1985
ClinicID	<p>Enter the clinic ID for every visit/row submitted for DDS. MNCM assigns the clinic ID at the time of registration. Clinic IDs are listed in the MNCM Data Portal.</p> <p>The clinic ID from the index contact is the clinic site that the patient will be attributed to.</p>	Text	999
Patient Gender New	Enter the patient's gender: Female = F; Male = M; Unknown = U	Text	F
Patient Zip Code New	<p>Enter the patient's 5-digit zip code of primary residence at the most recent encounter on or prior to 12/31/2009.</p> <ul style="list-style-type: none"> • <i>If EMR query extracts a 9-digit number, submit the 9-digit number (the portal will remove the last 4 digits automatically).</i> 	Text	55111
Race, Ethnicity, Language and Country of Origin fields	For the Depression Measures, these fields are voluntary for 2010 dates of service and will not be reported in 2011. These will be required fields for 2011 dates of service and will be used for risk stratification and reporting in 2012.		
OPTIONAL Race and Ethnicity Code Up to three possible categories: • Race1	<p>Enter the patient-reported race/ethnicity using the codes listed below. Enter one race or up to three races for patients that report multi-racial status. If race/ethnicity data is incomplete, leave blank.</p> <p>Enter 97 if the patient chooses not to disclose race/ethnicity.</p> <p>Enter 98 if the patient reports race/ethnicity is unknown.</p> <p><i>1 = American Indian or Alaska Native</i></p>	Number	Race1 = 1 Race2 = (blank or other listed code) Race3 = (blank or other listed code)

Updated 12-30-2009

Data Element Number/ Name	Notes	Excel Format	Example
	<p>.CSV.</p> <ul style="list-style-type: none"> If the member ID is a SSN (e.g., Medicare Fee-for-Service product), leave blank. If the patient does not have insurance (self-pay or uninsured), leave blank. 		
Diagnosis	<p>Enter the diagnosis code for the visit. In order for the patient to meet inclusion criteria, the diagnosis of major depression or dysthymia <u>and</u> a PHQ-9 score > 9 need to occur on the same visit/ contact. The major depression and dysthymia codes are as follows: 296.2x Major depressive disorder, single episode 296.3x Major depressive disorder, recurrent episode 300.4 Dysthymic disorder</p> <p>This visit is marked in the portal as the index contact (activation) which is the point for the start of measuring patient outcomes.</p> <ul style="list-style-type: none"> It is appropriate to include both newly diagnosed patients <u>and</u> patients with existing depression who have a PHQ-9 score > 9, indicating a need for treatment. If a patient visit record is submitted to the portal with the correct diagnosis codes but a low PHQ-9 score, this record will be rejected and the portal will keep searching until a visit with diagnosis codes and PHQ-9 > 9 occurs. Likewise, if a visit record is submitted with a high PHQ-9 score but no associated diagnosis codes, the record will be rejected. <u>Once a patient has an index visit</u>; subsequent visits are allowed to match up to that patient. Other diagnosis codes may be suppressed by the medical group or submitted as part of the record, regardless the portal will accept the subsequent records. If the patient does not yet have an index visit and other diagnosis codes are submitted, the records containing the other diagnosis will cause an error on file submission and will need to be removed. 	Text	296.32
Contact Date	<p>Enter the date of visit, telephone call, e-visit or other contact that is associated with the PHQ-9 tool given to the patient.</p> <ul style="list-style-type: none"> Once the patient has been identified as meeting the inclusion criteria of diagnosis codes and PHQ-9 > 9, <u>include all</u> subsequent contact dates and PHQ-9 scores for the patient, regardless of diagnosis or setting in which the PHQ-9 is administered within your medical group. Format this field as a Short Date in Excel (do not leave as "General" formatting) prior to converting your file to .csv. Incorrect formatting can lead to dates not sorting or converting correctly, adversely impacting programming logic and the assigning of index and new scores. 	Date (mm/dd/yyyy)	8/31/2010

MNCM Measurement and Field Specifications for Depression

Updated 12-30-2009

Data Element Number/ Name	Notes	Excel Format	Example
	<ul style="list-style-type: none"> • It is very important to sort your file by PatientID and Contact date, order of contact dates is oldest to newest. (5/12/2008 is an “older date” as compared to 2/1/2009 a “newer date”) This allows the portal program to evaluate each patient and incoming visit record correctly. Records that are out of sort order will not have the index and follow-up visits assigned appropriately and will not pass validation audit. • For each submission period; only submit contact dates within the range of the current measurement period. 		
PHQ-9 Score	<p>Enter the PHQ-9 total score associated with the contact date.</p> <p>Once the patient has been identified as meeting the inclusion criteria of diagnosis codes and PHQ-9 > 9, <u>include all</u> subsequent contact dates and PHQ-9 scores for the patient, regardless of diagnosis or setting in which the PHQ-9 is administered within your medical group.</p> <p>If no PHQ-9 was done, leave blank.</p> <p>Do not include decimals as part of the score, only submit whole scores Do not include incomplete PHQ-9 scores, in this situation leave the score field blank. <i>For example, a patient only answers the first 5 questions which total up to a score of 4, submitting a 4 might falsely indicate remission when this may not be the case.</i></p>	<p style="text-align: center;">Numeric (no decimals)</p>	13
Exclusion Reason	<p>If the patient has a valid reason for exclusion from the depression measures, enter the exclusion reason code:</p> <p>1 = Death 3 = Hospice 4 = Permanent Resident of Nursing Home 5 = Bipolar Disorder (Primary diagnosis changed) 6 = Personality Disorder (Primary diagnosis changed)</p> <p>Please Note: Do <u>not</u> exclude patients “up front” in the query process for identifying your population. Include the eligible patients as part of the submission file and enter a valid exclusion code and date. For patients with bipolar or personality disorder: Do not exclude patients who have these bipolar or personality codes just because the codes are present. If the patient has major depression codes <u>and</u> bipolar or personality codes, the patient needs to be <u>included</u>. Exclusions # 5 and 6 are only to be used if the patient is initially thought to have major depression or dysthymia and it is determined at a later date that the patient has bipolar or personality disorder.</p>	Numeric	1

MNCM Measurement and Field Specifications for Depression

Updated 12-30-2009

Data Element Number/ Name	Notes	Excel Format	Example
	<p><i>For example, a patient is diagnosed in April with major depression and a PHQ-9 score of 23, therefore meeting the inclusion criteria. Several visits/ contacts with PHQ-9s occur in April and May. In June the patient has a first manic episode and is determined to have bipolar disorder. This patient may be excluded using code 5 = Bipolar disorder because their diagnosis changed. This patient will be excluded from outcomes calculations. Please be advised that if a patient is excluded and in a future submission the major depression/ dysthymia codes are used and PHQ-9 score > 9, the patient will be considered eligible again and will be assigned a new index contact.</i></p>		
Exclusion Date	Date the patient exclusion is documented.	Date (mm/dd/yyyy)	8/25/2010

MNCM Measurement and Field Specifications for Depression

Updated 12-30-2009

Insurance Coverage Codes (listed alphabetically)

Medical groups are required to submit the patient’s insurance coverage code and member ID. MNMCM shares this information with the corresponding health plan who then maps the member ID to the appropriate insurance product category (e.g., Commercial, Medicaid, Medicare). The “self-pay” and “uninsured” codes identify patients without insurance.

Look at the patient’s insurance card and note the name and logo of the payer. Enter one of the codes below in the *Insurance Coverage Code* field that corresponds with the patient’s insurance coverage at the most recent encounter.

18	Aetna	30	MMSI (Mayo Management Services Inc.)
33	Allina Partners Care	13	MN Department of Human Services (Medicaid Fee-for-Service)
27	America’s PPO	6	Preferred One
22	American Family	10	PrimeWest (including by not limited to PMAP, MinnesotaCare, MSHO, GAMC, Medicare managed care products)
15	Blue Cross Blue Shield (not MN; Anthem, etc.)	25	Prudential
1	Blue Cross Blue Shield of Minnesota (including but not limited to Aware Gold, Blue Plus , Options Blue, Preferred Gold, Simply Blue, PMAP, MinnesotaCare, MSHO, GAMC, Medicare managed care products)	12	Sanford Health Plan
17	Cigna (Great West, etc.)	34	Security Health Plan
23	Comprehensive Care Services	16	Self-pay
2	FirstPlan Minnesota (including but not limited to PMAP, MinnesotaCare, MSHO, GAMC, Medicare managed care products)	9	South Country Health Alliance (SCHA) (including by not limited to PMAP, MinnesotaCare, MSHO, GAMC)
32	HealthEOS	24	State Farm
3	HealthPartners (including but not limited to individual or group plans, PMAP, MinnesotaCare, MSHO, GAMC, Medicare managed care products)	26	Travelers Insurance
14	Humana	7	UCare (including by not limited to PMAP, MinnesotaCare, MSHO, GAMC, Medicare managed care products)
21	Indian Health Services	29	Uninsured
11	Itasca Medical Care (including by not limited to PMAP, MinnesotaCare, MSHO, GAMC, Medicare managed care products)	31	United Health Care
